Well Service Valves and Seats

Made in USA & Made in China

We manufacture replacement valve inserts and bonded valve inserts for all applications. Humble Industries uses the latest urethane compounds available for standard service and Hi-Temp applications.

All the valves and seats are interchangeable to Novatech, NOV Mission, Dragon, Weir SPM, Halliburton, Serva, Gardner Denver, TSC.

Features and Benefits:

- Cast N Place Valve Insert
- Increased resistance to abrasion and extrusion
- Operating pressure ratings up to 15,000 PSI

Valve (wing)		Size				
		2.75 - 3.00	3.50 - 4.00	4.50 - 5.00	5.50 - 6.00	6.50 - 7.00
Style	Bonded Insert	X	X	X	X	X
	Press Insert	X	X	X	X	X
	Bonded Burst			X		
	Press Burst			X		

*1 available in GD style

Seat		Size				
		2.75 - 3.00	3.50 - 4.00	4.50 - 5.00	5.50 - 6.00	6.50 - 7.00
Style	AWS	X	X	X1	X	
	YWS		X	X2	X	X

*1 available FMC WT2400/FMC WT2700
*2 available in GD style

Centrifugal Pumps and Parts

Made in USA & Made in China

Premium Rig Parts supply NOV Mission Fluid King full line products.

Proven to be the best centrifugal pump design for handling abrasive mud, the NOV Mission Fluid King Centrifugal pump line offers a broad selection of innovative features for a variety of routine, demanding, abrasive and corrosive applications.

NOV's Mission Magnum has been the most popular centrifugal pump in the drilling industry since the 1970's because of its proven reliability, durability, and economical structure.

All pumps can be unitized with electric motors, diesel engines, and hydraulic motors (horizontal, vertical, or close coupled configuration).

Well Service Packing

Premium well service packing is backed by many years of engineering and combined with customers the fastest delivery time in the industry. Whatever abrasive, high pressure, high volume operation you have planned for your wellbore, we have you covered. Premium well service products enhance pumping performance on multiple fronts:

- Delivery
- Expertise
- Reliability
- Engineered Solutions

Together we offer the shortest lead times in the industry making reliable, fast delivery a priority. We ensure that your job proceeds smoothly, efficiently and on schedule. With multiple decades in the sealing business, our technical oilfield experts bring the most advanced materials, technologies and manufacturing processes, knowledge and skill to you, in the office and in the field. We understand your objectives and can help you quickly implement the best solutions. Our objective is zero product-related downtime in the most extreme pressure pumping applications worldwide.

Features and Benefits:

- Operating pressure ratings up to 20,000 PSI
- Multitude of materials to best fit pumping conditions
- Individual, Replacement, and Complete sets available

Premium well service packing products are available in a variety of materials to meet your specific requirements.

Well Service Plungers

Premium offers high quality plungers for all pump styles and manufacturers. All plungers are engineered and manufactured to precise dimensions with hardened coatings and surface finishes that are necessary for rugged well service applications. We work alongside manufacturing to continuously develop advances in coating technologies that can handle the harsh environments of the fracturing and the well service industry.

Our state-of-the-art flame metal spray process ensures consistency and reliability. Premium plungers are designed for every style of fluid ends ranging in size from 3.75 to 6.5 inches in overall diameter.

Features and Benefits:

- Superior Wear Resistance
- Harder Working Surface - 59-63 Rockwell
- Surface finish below 16 RMS
- Custom sizes and specifications available

Fluid End Expendables

Premium is an original equipment manufacturer of quality pump expendables for the most common frac pump configurations. Specifically manufactured from the highest quality steel, our expendables get the job done where others fail. Premium manufactures replacement parts for all well servicing pumps and fluid ends on the market today.

Well Service Fluid Ends

Premium fluid ends are forged using wide-die techniques which assure consolidated centers and fine grain structure, resulting in improved properties throughout. They are 100% ultrasonically tested according to the #A388 ASTM standard.

The chemical composition of our fluid ends has been carefully formulated to enhance performance in all applications. This, in conjunction with special processing steps, creates a high-performance fluid end that is unmatched in the Oil & Gas industry.

We offer carbon alloy and stainless steel material for “Y” style and traditional valve over valve fluid ends.

- Triplex 2250 HP
- Quintuplex 2500 HP
- HT400
- TWS600S
